

# INDIA MAPS

All data sets comply with accepted standards of spatial integrity. These are vector maps in layers, sourced and digitized from satellite images. Data sets are updated from field visits and secondary published sources. Historical maps for several areas are also available. Map data sets are available in ESRI, MapInfo, AutoCAD Map and other formats. Metadata is provided in OGC standard. Data can be provided seamlessly for the nation, individual states, a cluster of states or smaller areas.

Explain your requirement, so that we can suggest a suitable product for you. Some maps may not be on this list. Our India maps are in several university libraries. Faculty, researchers and students are encouraged to check out the catalogues in their own universities to make best use of these resources. Current affiliates of Stanford University and Princeton University will find that their libraries hold data purchased through ML Infomap. Contact ML Infomap if you have other map requirements.

## INDIA PARLIAMENTARY CONSTITUENCEIES

Includes current parliamentary constituency boundaries with demographic profile and 2009, 2014 elections results. Pre-1974 constituency boundaries with multiple Lok Sabha elections data are also available.

## STATE ASSEMBLY CONSTITUENCEIES

Includes all current state assembly constituency boundaries with demographic profile, recent and earlier elections data. Pre-1974 constituency boundaries with multiple elections data are also available.

## INDIA CITY MAPS

Metropolises, cities and towns along with their outgrowths are available. Maps include roads, bridges, landmarks, railway lines, metro lines, stations, rivers, lakes, parks. 150 categories of Points of Interest; Locality, PIN code and ward boundaries are also available.

## CITY MUNICIPAL WARDS

City municipal limit and ward boundary maps are available for over 1000 cities of India. The ward boundaries are linked to 2011 Census demographics. For most cities, wards are further subdivided into named localities/ neighborhoods.

## INDIA NATIONAL BASEMAP

This is a great product to begin your collection. The map layers include: international, state, district and sub-district boundaries, position of all cities/towns, road network (expressways, highways & major roads), railway lines, important water bodies, national parks and sanctuaries.

## INDIA ADMINISTRATIVE DISTRICTS

All Administrative districts from Census 1931 to 2011, linked to Census demographics, are available for India. District's boundaries for 2017 are also available.

## GOLDEN QUADRILATERAL

We have a current road map for the Golden Quadrilateral, North-South and East-West Corridors of India. This comes with data on length, lanes, direction, etc for each road section.

## INDIA VILLAGE BOUNDARIES

All village boundaries are available linked to Census demographics. There are over 640 thousand villages for 2011 and around 638 thousand villages marked for 2001. These villages are also offered as point locations.

## CLIMATE MAPS

Based on IMD published climatic normal's, we have organized years of meteorological statistics of India. Researchers can now study climatic variables, their trends and patterns, for several decades across the country.

## INDIA TERRAIN MAPS

We provide 50mX50m and 100mx100m pixels raster elevation data in geotiff; 100m interval contour vectors (smaller intervals for gentle slopes and plains); DEM and Isometric colour height maps.
